Skills

HTML5 | CSS | Javascript | Reactjs | React Native | Bootstrap | Material UI | Tailwand Css

Typescript | Redux | Unit Testing | Integration Testing | Git | VScode | RESTfull API

Professional Experience

Software developer   2022/04 – 2023 May
Extened web app tech

- Achieved consistent success in meeting project deadlines and surpassing performance targets throughout **one year** of employment, demonstrating strong time management and a goal-oriented approach.
- Developed and maintained React-based front-end applications, adhering to best practices and coding standards.
- Collaborated with the design team to create pixel-perfect user interfaces using MaterialUI, ensuring superior user experiences.
- Integrated front-end applications with RESTful APIs, enhancing data flow and overall functionality.
- Led cross-functional teams in defining, designing, and delivering innovative features on schedule
- Implemented comprehensive unit and integration tests, achieving 80% test coverage and improving software stability.
- Stayed current with industry trends and best practices in React and frontend development by reading blogs and news from various sources and using the latest frameworks and libraries.
- Provided technical support and troubleshooting, minimizing application downtime
- Trained multiple trainees for Reactjs to work on multiple projects through in-person training, which resulted in the trainees completing their projects on time.
- Provide conceptual sessions for ReactJS freshers by explaining how to use the API, and how to integrate it with the backend.

Projects

Extended Asset Management
Asset Management Web App

- Collaborated with the development team to create a user-friendly asset management system for a software office
- Utilized React.js and Material UI for the front-end, ensuring an intuitive user experience.
- Integrated front-end with back-end APIs via Axios for seamless data handling.
- Enhanced system functionality with features like asset search, filtering, sorting, and pagination, contributing to an agile team environment.

Netflix GPT ⌁
Streaming Movies App

- I developed a **Netflix GPT** website for movie streaming using React.js and Tailwind CSS for an engaging user interface.
- Firebase is used for user authentication and uses open API keys for getting movie results
- For search results, I used YouTube auto-suggestion API for a better user experience and user can select language
- Applied problem-solving skills to optimize website performance and enhance the user experience.

Fipola Food App

Mobile App ‖ React Native ‖ Food Ordering App

- Developed a cross-platform mobile application using the React Native framework for Android platforms.
- Integrated with backend APIs to fetch and display real-time data such as restaurant listings, menu items, and user reviews.
- Utilized navigation libraries like React Navigation for seamless navigation between screens and improved app flow.
- Actively collaborated with a team of designers and developers to brainstorm ideas, review code, and implement new features according to project requirements.

Courses

React Js   2023/12 – 2024/03
Namaste Developer akhshay saini

Continuous Capacity Building program Intensive Bootcamp Trainee   2021/08 – 2022/03
NxtWave Disruptive Technologies
